ATTN : The Comptroller
: Chief, Budget Division
: Chief of Logistics

8 Jul 1953

Request for Funds to Support Operational Requirements

6-10-78

1. It is the understanding of the Logistics Office that commencing 1 July 1953 the Comptroller will allot funds for which procurement and issue will be effected by the Logistics Office as opposed to the previous system whereby funds were allocated direct to the activity concerned.

2. Since 1 July 1953, the Logistics Office has received numerous requests for operational material which is not in stock and which is required in support of operations. Further, these requests are for items which were not included in the approved FY-53 'Shopping List'.

3. During the first two quarters of FY-53 a total of [REDACTED] was expended by the Logistics Office in the procurement of operational type material. It is recognized that in order to fulfill the logistical mission and to enable operations to proceed, it is necessary that funds be made available on an interim basis for July, August and September of FY-54 until final material requirements and funding aspects are reconciled.

4. It is anticipated that factual requirements will be available on or about 1 August 1954. However, action must be taken to allocate funds to the Logistics Office so that procurement action may be initiated without delay.

5. In view of the factors outlined above, it is requested that [REDACTED] be made available to the Logistics Office for each month for the first three (3) months of FY-54. Further, it is requested that 60% of this amount be unvouchered funds and the balance vouchered funds.

JAMES A. GARRISON
